Job Posting - Senior Mobile Product Designer

> As Product Designer, **you will be involved in every aspect of the product development process, from brainstorming the next great product innovation to tweaking pixels right before launch**. You will be expected to utilize your full range of product design, interaction design, and visual design skills, and you will own the experience for a wide area of the product.

Come be a part of a team of designers passionate about creating the very best product for millions of users.

Our team **located in London** is looking for a senior Product Designer that wants to make an impact in a highly technical and challenging domain. You will lead the design of the next generation product to prioritize events and triage incidents to enhance the decision making process that is critical to maintain the reliability of all of our products worldwide.

Product Designer Responsibilities

☑ **Take broad, conceptual ideas and turn them into something useful and valuable**

In the old "golden days", designers were taken in to make visual designs of the product. They took instructions from the product managers and started their work at the design phase. At us, product designers are working with continuous collaboration with product managers and engineers at every phase of the product development process.

☑ **Design flows and experiences that are incredibly simple and elegant**

A great designer takes a complex problem, and turns it to a simple solution. In our product this is a daily challenge - we strive to make the complex simple, and enable millions of users to benefit of our product every day.

☑ **Contribute to high-level strategic decisions**

Your work isn't just about the end-product - we expect you to influence our culture, long term vision & bring diversity to the table

☑ **Give and solicit feedback from other designers in order to continually raise our bar**

We know we aren't perfect - and never be - but we want to get better every day. One of the main drivers we use to achieve that goal is feedback. We expect you to give, and receive feedback graciously.

☑ **Partner with PMs, engineers, researchers and content strategists to oversee the user experience of a product from conception until launch (and then some)**

We work in cross-functional teams, and believe we need exceptional talent in every position. The best products are born when these teams have deep collaboration, and work as partners.
